

DEFENDER PRO

A green tree and shrub shelter with a unique staking and securing system, ensuring swift planting and easy maintenance.

Manufactured from environmentally responsible, recyclable polypropylene with an in-built top lip to minimise abrasion to the tree stem and a perforated line to ensure the shelter splits open as the girth of the tree increases.

A cost-effective solution delivered 'flat pack' to enable larger quantities on a smaller scale than traditional round rigid shelters.

With a unique staking and securing system, the Defender Pro ensures planting is done simply and swiftly whilst maintenance can be carried out with the same level of simplicity and speed.

Sizes

Tree Shelter Heights	60cm
	75cm
	1.2m
	1.5m
Shrub Shelter Heights	60cm
	75cm
Tree Shelter Cross Section	8.5cm x 8.5cm
Shrub Shelter Heights	15cm x 15cm

Benefits

- Made from UV stabilised polypropylene
- Durable twin-walled construction
- Designed to be transported flat pack
- Estimated lifespan of 5 to 7 years
- Unique 'no ties' securing system
- Perforated line allowing the shelter to split open as the girth of the tree increases

Applications

- Forestry projects
- Landscaping projects
- Fruit Growing
- Viticulture
