

ECOMATT 750G MULCH MAT

Rural Tree Planting

Made from 100% recycled jute, this weed suppressant, aeration fabric allows air and water to pass through the layers.

Ecomatt 750g allows air and water to pass through the layers while suppressing weed growth within the vicinity of the plants root development area, while retaining moisture in times of drought. It acts as an insulator by absorbing heat and lasting a minimum of two seasons.

Specification

Size	50cm x 50cm 100cm x 100cm
Nominal Thickness	5mm
Weight	750g
Fibre Composition	100% recycled jute

Benefits

- Helps suppress weed growth
- Allows water and air to percolate through the wool layer to retain moisture in drought conditions
- Fully degradable and acts an insulator to create an assisted environment for plants to establish themselves

Additional Information

Fix into position using pegs to steel pins (5 per mat or 2-3 per m²).

For gradients up to 45-50° use 750g Ecomatt - for lower gradients, please see our 450g Ecomatt.
