

# NEWT FENCING

A 1000 gauge polythene barrier for use as newt, amphibian and reptile fencing.

Newt fencing is a 100% recycled polythene barrier providing exceptional tear resistance and strength in exposed areas - an ideal material to trap, provide refuge or survey newts. A UV stabilised barrier with a lifespan of 5 years with excellent weather resistance.

## Installation

To install, dig a trench and position the barrier in place to create a fence with wooden stakes, washers and nails.

## Specification
