

# VOLE/STRIMMER GUARDS

## Rural Tree Planting

Vole Guards provide basic protection for trees at risk of vole attacks or strimmer protection.

These guards have a single wall for rigidity and wrapped to allow the guard to expand as the tree grows, the vole guard is an economic solution for protection against these hazards.

They are small, lightweight and expand as the tree establishes to avoid strangulation.

### Benefits

- Protects young trees from vole and mouse damage
- Tightly rolled plastic cylinders that hold their shape
- Retains a sufficient overlap to enable the guards to expand as the tree grows and matures

### Specification

<b>Material</b>	Standard - Polypropylene Spiral - PVC
<b>Height</b>	20cm
<b>Diameter</b>	38mm
<b>Colour</b>	Standard - Brown Spiral - Brown or Clear
