

GREEN SCREEN

Urban Tree Planting & Tree Irrigation

A steel grid with densely intertwined climbing plants to provide instant privacy.

The plants are supplied in a coconut fibre root container filled with potting soil, with a strong metal frame. The coconut planter is a mixture of coconut fibres (coir), held together by natural latex. Once installed, the biodegradable coconut planter completely degrades within 1 to 2 years. This system allows the full, healthy development of the hedge and its root system. Can be installed all-year round however avoid planting during a prolonged frost.

Benefits

- Instant privacy and greenery result
- Easy and fast to install
- Contributes to biodiversity and a healthy environment
- Improves air quality
- Reduces fine dust by 40-60%
- Contributes to the greening of urban areas

Features

- Fully grown
- Certified sustainable production
- Can be planted throughout the year, except during frost
- Biodegradable pot made of coconut fibres
- Environmentally-friendly

Technical Data

Height x Width	1m, 1.55m, 1.8m, 2m, 2.2m, 3m x 1.2m
Plant Varieties	Euonymus Fort 'Dart's Blanket' Hedera Helix 'Woemer' Hedera Helix 'Glacier' Hedera Hibernica (Irish Ivy) Hedera Helix 'White Ripple' Hedera Helix 'Green Ripple' Hedera Helix 'Goldchild' Carpinus Betulus (Hornbeam) Pyracantha 'Dart's Red' Trachelospermum Jasminoides Elaeagnus Ebbingei
Installation	Posts, brackets, grid extensions and gates may be required - speak to your installer for advice.
Soil	Soil rich in humus, suitable for shrub planting. Trench must be 40cm deep with good water-permeability and surface water drainage properties.
