Technical Data Sheet

NIDDERDALE TREE GUARD

green-tech
Plant • Protect • Enhance • Improve

Urban Tree Planting & Tree Irrigation

Manufactured from UK sourced, mild carbon steel of fully welded construction.

The standard finish is a hot dip galvanised to BS EN ISO 1461 - alternatively a rich primer and hardwearing polyester powder coating. We are also able to supply these guards in your corporate colours to match any specification design.

Specification

Material: Mild Steel
Standard Finish: Hot Dip Galvanised to BS EN ISO 1461
Optional Finish: Painted in black rust resistant gloss and oven baked. Other RAL colours available on request.

Height	Diameter
1800mm	400mm
1800mm	600mm

Other diameters available on request.

Installation

Nidderdale Tree Guards are supplied in two halves for ease of transit and simply bolt together to form a complete guard. The tree guards are versatile and can be supplied with either a ground fixing or bolt fixing. The ground fixing allows the guard to be pushed into the ground and secured by guard spikes. Bolt fixing the guard permits the guard to be fixed into a tree grille with ease.

- Manufactured from mild carbon steel
- Fully welded construction
- Contemporary design
- High quality finish
- Simple installation
