SPEEDWAY TOTAL can be used in the following situations with the following restrictions.

The following at a maximum concentration of 2.0 % ν/ν	
All non edible crops	All authorised plant protection products

The following at a maximum concentration of 0.2 % ν/ν	
Non-crop production	All authorised plant protection products

**For maximum number of treatments and latest time of application:
ALWAYS FOLLOW THE STATUTORY CONDITIONS OF USE OF THE
PLANT PROTECTION PRODUCT.**

Rates of Use

For non-edible crops: Per 100 L spray solution, use up to 2 L **Speedway Total**

For non-crop production, Per 100 L spray solution use up to 200 ml **Speedway Total**

For total spray volume, refer to the accompanying plant protection product instructions.

Always ensure thorough wetting of the target.

Uses advised against:

Do not use with fertilisers or trace elements.

Mixing and Spraying

Before use ensure that all spraying equipment is clean. Add half the required volume of water and start agitation, add the required quantity of **Speedway Total**. Add the plant protection product and fill the tank to the required volume whilst maintaining agitation. Continuous agitation must be maintained until spraying is complete. All application equipment must be thoroughly cleaned with water prior to storage or use on another crop.
